Thermostatic mixers for concealed installation

Product description

Thermostatic mixers made from grade 304 stainless steel.

The mixers are concealed in the wall and are installed in the type-approved built-in box (Scandtap Box 1) with the included washer and nut on the pre-assembled threaded rods.

Intended use

Thermostatic mixers, for hot and cold tap water, intended to be used for showers and bathtubs.

Scope

See table under the heading "Comments".

Approval

The products meet the requirements of Chapter 8, Section 4, of the "Planning and Building Act" (PBA) regarding the technical characteristics of construction works, protection regarding hygiene, health and the environment, depending on, that what is stated in this approval is followed. The products are approved according to the following section(s) of "Boverket's Building Regulations" (BBR):

Construction products with assessed properties 1:4

Tap water installations 6:62 (first sentence and paragraph 2 and general recommendations)

Tap water flow 6:623 (first sentence)

Backflow 6:624

Design 6:625 (paragraph 1 and 4)

Marking

Marking must be affixed on the product or, if there are special reasons, on the packaging or the delivery note. Marking shall indicate the following information:

Control

The manufacturers' continuous internal control is combined with surveillance inspections conducted by an accredited Inspection Body.

Inspection Body: **Kiwa Certification AB**

Control agreement: **485/2021, dated 2021-12-20**

Factory production control shall be carried out in accordance with the instructions for control in the control agreement **485/2021, dated 2021-12-20**.

During inspection at the construction site, the building proprietor must verify the identity of the product by means of the marking. Furthermore, the building proprietor must ensure that the correct products are delivered and that they are installed in accordance with the manufacturer's instructions in the accompanying documents. It must also be verified that the product is accompanied by a manufacturer's declaration that certifies that production has been carried out in accordance with the documents that formed the basis for this type approval.

The validity of the Swedish Type Approval also implies that the factory production control is carried out according to agreement **485/2021, dated 2021-12-20** and that the holder annually fulfils the requirement in "Boverket's regulations and general recommendations for type approval", BFS 2013:6, § 5 (TYP 7), on continuing production control.

Associated documents
